SUPUN NISHANTHA

supunnishantha45@gmail.com | +94 77 646 0118 | Panagoda, Sri Lanka

supun200110 | Supun Nishantha Silva

Summary

Enthusiastic and detail-driven undergraduate IT student with a strong interest in AI/ML, full-stack development, and mobile app design. Experienced in developing scalable web and mobile applications integrated with AI-driven features, I possess a keen interest in building complex, robust systems and leveraging data to derive valuable insights. I am passionate about applying innovative ideas to solve real-world challenges while growing as a collaborative member of a dynamic software engineering team.

EDUCATION

Horizon Campus Malabe *2022 - Present*
B.Sc. (Hons) in information Technology

Rajasinghe Central College, Hanwella *2018-2020*
GCE Advanced Level

Professional Skills

- **Programming Languages:** Python, Java, C, JavaScript
- **Machine Learning:** AI/ML, Supervised & Unsupervised Learning, Deep Learning
- **Frameworks & Libraries:** TensorFlow, Keras, scikit-learn, Pandas, Matplotlib
- **Web Development:** React, HTML, CSS, Tailwind CSS, Node.js, Express.js
- **Databases:** MongoDB, MySQL
- **Mobile App Development:** Flutter, Android (Java)
- **UI/UX:** Figma
- **Project Management:** Jira Software
- **Tools & IDEs:** Android Studio, VS Code, Anaconda, Jupyter Notebook
- **Others:** Git, GitHub, Postman, Swagg

Projects

Crystal Beauty Clear E-Commerce Platform

Technologies: React, Node.js, Express.js, MongoDB, Tailwind CSS, Supabase, JWT

- Built a full-stack e-commerce system featuring authentication, product management, and order processing.
- Ensured scalability and maintainability through modular architecture and secure data management

Workout Planner Mobile Application

Technologies: Flutter, Dart

- Built a cross-platform mobile fitness application featuring personalised user profiles, interactive workout tracking, equipment browsing, and a favourites management system.
- Ensured a seamless and responsive user experience through a modular UI architecture and robust local state management.

COVID-19 Tracker & AI Chatbot

Technologies: Python, Streamlit, LangChain, OpenRouter API, REST APIs, HTML/CSS

- Built an interactive web application featuring real-time global health statistics tracking and an AI-powered conversational assistant.
- Integrated public external APIs for live data retrieval and leveraged large language models to provide accurate, context-aware user guidance.

Research Publication

Machine Learning-Based Rainfall Prediction and Decentralized Energy in Sri Lanka 2025

- Published extended abstract at the Horizon Interdisciplinary Research Symposium (HIRS) 2025 presenting a machine learning-based approach for forecasting Sri Lanka's monthly rainfall, hydroelectric output, and total power generation.

Certification

- Machine Learning Foundations: AWS
- AWS Educate Machine Learning Foundations
- AWS Educate Introduction to Generative AI
- AI/ML Engineer -Stage 1: SLIIT
- Introduction to Generative AI: AWS
- Intro to Machine Learning, Kaggle (2024)

Strenghts

- Teamwork, leadership, and collaboration
- Creativity, visual thinking, and time management
- Problem-solving and analytical skills
